ALFA ROMEO JUNIOR IBRIDA 1.2 136hp (100 kW) Hybrid 6 speed

THE SPORTIVITY BECOMES IBRIDA

In terms of available engines, Alfa Romeo Junior Hybrid combines a 1.2-litre VGT three-cylinder engine, delivering 136 hp and 230 Nm of torque, with a 48-volt and 21 kW P2 electric motor, combined with a six-speed DCT automatic transmission for a smooth and efficient ride. With CO2 emissions reduced to just 109 g/km in the combined WLTP cycle, the hybrid system maximizes efficiency and, thanks to the e-Boost function, ensures extra performance and power during acceleration. Alfa Romeo Junior Hybrid reaches a top speed of 206 km/h and accelerates from 0 to 100 km/h in 8.9 seconds, offering exciting performance and a sporty driving experience.

Italian design

The perfect combination of style and innovation: pure exaltation of Italian design combined with excellence in attention to detail, embellished by the Alfa Romeo Legendary Shield and the Palette cambio at the wheel.

SAFETY AND POWER: THE ARE RESTABLABLE BINOMIO OF ADAS SYSTEMS

With Alfa Romeo's ADAS systems, safety meets power. Alfa Romeo Junior Hybrid is equipped with advanced driver assistance systems (ADAS), designed to give you maximum control and protection on every road. From autonomous emergency braking to road sign detection, every ADAS technology is designed to ensure a highly dynamic and safe driving experience, without compromise.

Ready to drive your days

The new Alfa Romeo Junior Hybrid stands out for its wide spaciousness and boot capacity that exceeds 400 litres.

Pure Passion at the Guide

Superior performance and road holding on any terrain, offering the driving dynamics in pure Alfa Romeo style. Available 17" alloy wheels.

Advanced connectivity

Alfa Romeo Junior Hybrid offers a Advanced on-board connectivity, with a voice assistant enhanced by Chat GPT AI generation for perfect interaction and comfort.

ALFA ROMEO JUNIOR ELETTRICA

54 kWh 115 kW 156 hp FWD
54 kWh 207kW 280 hp FWD

100% Electric

The Alfa Romeo Junior offers an electrifying driving experience with two powerful full electric motors: the 156 HP motor with a peak torque of 260 Nm and the Veloce variant, delivering an impressive 280 HP and a peak torque of 345 Nm. With features like the limited-slip differential and a dedicated chassis setup, the Veloce version promises exhilarating performance and a thrilling driving experience.

Battery and charging times

With AC charging, it can reach a full charge from 0 to 100% in 5 hours and 45 minutes. Utilising rapid DC charging up to 100 kW, it can recharge from 20% to 80% in just 27 minutes.

Driving Dynamics

With front and rear anti-roll bars tuned for sporty performance, lowered springs by 25mm, and optimally dampened shock absorbers, every curve becomes an opportunity for precision. Coupled with precise steering and the torsen limited-slip differential, the Alfa Romeo Junior the full potential of dynamic driving on any road.

Electric range

The Alfa Romeo Junior, offered in both 156 HP and 280 HP variants, is equipped with a robust 54 kWh battery, providing a comprehensive mixed range of 402km. Engineered with an optimized weight, the battery ensures a perfect balance between efficiency and driving agility.

Acceleration and performance

The new Alfa Romeo Junior is a thrilling fusion of innovation and performance, faithful to the sporty Alfa Romeo DNA. The 280 Veloce version boasts a top speed surpassing 200 kph and acceleration from 0 to 100 kph in 5.9 seconds, every drive is a symphony of performance and agility.

DNA

DYNAMIC: tailor-made for exhilarating sports driving experiences. With enhanced power delivery and sharp steering response, it offers maximum agility and control.

NATURAL: ideal for everyday driving, the Natural Mode ensures a harmonious balance between performance and comfort. The electric motor and steering responsiveness are optimized for a smoother ride for your daily drive.

ADVANCED EFFICIENCY: designed to maximize energy efficiency and electric range, without compromising on driving pleasure.

ALFA ROMEO JUNIOR ADAS Standard Safety

JUNIOR

LANE CENTERING

The Lane Centering system in your new Alfa Romeo Junior ensures the vehicle stays centred within its lane, even in busy traffic. It detects lane markings and actively maintains the vehicle's position in the middle of the lane.

TRAFFIC SIGN RECOGNITION

Traffic Sign Recognition detects and displays common road signs in real-time, providing you with crucial information such as speed limits, no passing zones and other important signs. With this feature, you can effortlessly stay updated and ensure compliance with road regulations for a safer and more informed driving experience.

DRIVER ATTENTION ASSIST

Driver Attention Assist monitors the vehicle's movement and travel time. It warns the driver with a cup alert on the TFT display when a break is warranted.

AUTONOMOUS EMERGENCY BRAKING

The Autonomous Emergency Braking system helps prevent or reduce the severity of collisions by automatically applying the brakes if the driver doesn't react in time to avoid hitting the vehicle ahead or a pedestrian/cyclist.

ADAPTIVE CRUISE CONTROL

Adaptive Cruise Control offers seamless speed control and distance adaptation, allowing drivers to relax without constant pedal pressure. The system, equipped with Stop & Go, ensures consistent cruising speed and safe spacing from preceding vehicles. Additionally, upon driver request, it can intelligently adjust speed based on recognized road limits.

ALFA ROMEO JUNIOR ELETTRICA ADAS SPECIALE Safety

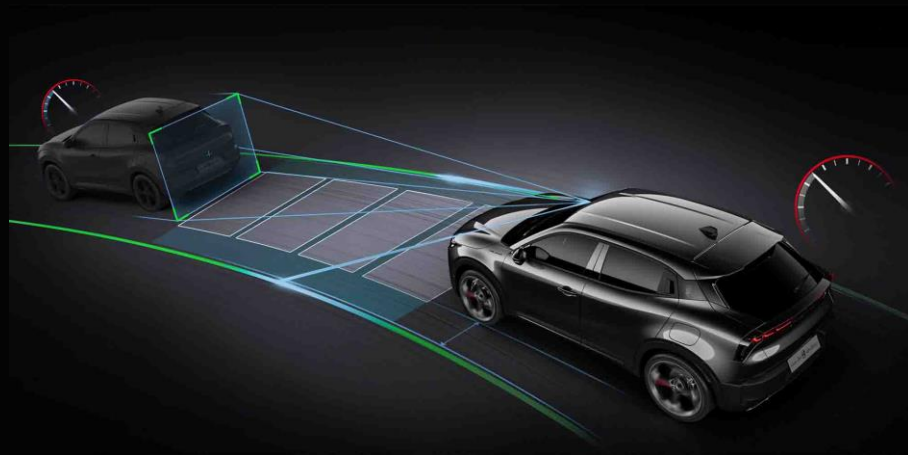

*Standard from Speciale spec

JUNIOR

Level 2 Assisted Driving*

The new Alfa Romeo Junior can achieve Level 2 Assisted Driving thanks to the optional Technology pack which includes a front camera, front radar, Adaptive Cruise Control (IACC), and Lane Centring (LC). These systems work together to help the driver maintain the correct position on the road with minimal intervention. They assist in maintaining the right speed and staying in the centre of the lane, reducing the risk of collisions, especially in congested traffic situations where accidents are more likely. However, it's important to note that the driver remains in control at all times.

PARKING ASSISTANCE*

The 180° View Camera provides a comprehensive view of the car's surroundings via the 10.25" digital touchscreen, complete with a dynamic grid. This camera is supported by 12 sensors. The built-in software generates a top-down view and alerts the driver visually through the instrument cluster and audibly with a chime if an obstacle is detected in the car's trajectory.

JUNIOR

The dimensions of the Alfa Romeo Junior are designed to embody the perfect sporty compact car, with 4,173 mm in length and 1,532 mm in height (1,505 mm for the Veloce version). The boot accommodates a spacious cargo volume of up to 415 litres (400 litres in Electrica), offering ample storage for luggage and belongings, thereby making it a versatile and practical choice for both city commuting and road trips.
